Project Compass

IGC has been retained by MOBI (“Company”; “Mobi”), on an exclusive basis, to advise the Company in its M&A process (“Transaction”). This material (“Information Memorandum”) describes and summarizes the Company, its assets, market and economic and financial indicators and has been prepared exclusively to assist the recipient in deciding whether it wishes to proceed with a further investigation of a possible Transaction with the Company. In no event shall the recipient use any of this information for any commercial purposes or for purposes other than the one for which this memorandum is furnished.

All information contained in this Information Memorandum has been prepared based on the documents and/or information provided by the Company or obtained directly by IGC through legal sources and/or through independent research. IGC has not investigated, verified or audited the documents and information used for its preparation. This Information Memorandum contains statements, estimates and projections provided by the Client concerning anticipated future performance, which may or may not prove to be correct. No representations, expressed or implied, are made as to their accuracy.

This Memorandum of Information is not intended to form any part of the basis of any investment decision or other evaluation, or any decision to participate in the Transaction process, and should not be considered a recommendation by the Company or IGC to any reader. Each reader must make its own valuation of the Transaction in order to determine whether to continue with its participation in the process. No liability is or shall be attributed to the members of IGC, including its partners, directors or employees, in connection with the accuracy or completeness of the information contained herein.

This material belongs to IGC and shall not be copied, reproduced, distributed and/or disclosed, in whole or in part, including by digital media, to any third party without the express and prior written consent of IGC. By accepting this material, the recipient agrees to return it as soon as requested by IGC, and to maintain strict confidentiality over all information contained herein.

Since the existence of the Transaction is not publicly disclosed and may not be known by members of the Company or third parties, the recipient agrees not to approach or contact any officer, employee, client, supplier or representative of the Company without the express written permission of IGC. In furnishing this material, IGC undertakes no obligation to provide access to additional information, to update it, or to correct any inaccuracies which may become apparent, and reserves the right, at any time and without notice, to change the procedure for the Transaction or terminate negotiations prior to the execution of any binding agreement.

All communications, questions and/or requests regarding this material shall be addressed directly to IGC.

Mobi at a glance

An urban mobility platform with +20 years of operations, serving employees of large corporations and residents of condominiums

Essential mobility platform

Route-optimized transportation for corporations and condominiums, underpinning a recurring-revenue model

Scaled operational platform

Modern fleet backed by intensive monitoring and telemetry, tailored to each client's needs

Visible, resilient cash flow

Long-term contracts (3–5 years) with built-in price adjustment mechanisms supporting margin resilience

Strategic footprint

Headquarters in Goiânia plus 10 operational bases across Goiás, the Federal District and Minas Gerais

KEY HIGHLIGHTS

SELECTED CLIENTS

What Mobi does

Mobi operates dedicated employee-transportation contracts (fretamento) – planning, running and monitoring fixed routes on behalf of its clients

▶ **Dedicated, not shared**

Vehicles and drivers are committed to a single client contract, which is what makes revenue recurring and predictable

▶ **Owned, not leased**

100% of the operating fleet is owned, giving Mobi control over service quality, availability and asset value

▶ **Contracted, not spot**

3–5 year contracts with IPCA, collective-bargaining and diesel pass-through clauses protect margin over the cycle

Source: Company. Illustrative representation of the service model; contract-level operating metrics to be confirmed with management.

Two client fronts on one operating platform

The same fleet, bases and monitoring infrastructure serve corporate employee transportation and condominium residents

Corporate employee transportation

Route-optimized transportation of employees to and from industrial, agribusiness and consumer-goods sites — the core of the platform

- ▶ Blue-chip client base including Heineken, Roche, Kraft Heinz and Cargill
- ▶ Long-term contracts (3–5 years) with price-adjustment mechanisms
- ▶ Driven by clients' operational needs and NR-31 compliance requirements

Condominium & urban mobility

Transportation for residents of condominiums, extending the platform beyond the corporate segment using the same operating base

- ▶ Same fleet, operational bases and monitoring standards
- ▶ Broadens the addressable market beyond corporate contracts
- ▶ Segment economics to be confirmed with management

Source: Company management information; Project Compass teaser. Revenue split between client fronts to be confirmed with management.

Recent momentum across both operating entities

Gross revenue grew +41.3% year-on-year in the first quarter, with both operating entities expanding

Source: Company management information. 1Q gross revenue by operating entity, 1Q26 vs. 1Q25. Entity-level scope of operations to be confirmed with management.

A structurally supported corporate mobility market

Demand for outsourced employee transportation is underpinned by regulation, labour scarcity and client operating needs

Regulatory requirement

NR-31 and related labour regulations require compliant employee transport where adequate public transit is unavailable, making the service non-discretionary for many industrial and agribusiness sites

Professional driver shortage

A national shortage of qualified professional drivers raises the barrier to entry and favours operators that can recruit, train and retain drivers at scale

Outsourcing of non-core logistics

Corporations increasingly outsource employee transportation to specialised operators rather than running fleets in-house, converting fixed assets into contracted service costs

Fragmented supplier base

The Brazilian fretamento market remains highly fragmented among small regional operators, creating consolidation opportunity for platforms with scale and governance

Executive Summary

▶ INTRODUCTION 04

▶ INVESTMENT THESIS 10

▶ COMPANY OVERVIEW 17

▶ FINANCIAL HIGHLIGHTS 25

Mobi▶

Mobi is well positioned for continued growth

A resilient, contracted business model supported by strong structural value drivers

1

Essential mobility platform in a structurally growing market — Consistent demand from corporations and condominiums, a national driver shortage and labour regulations (NR-31) sustain recurring demand

2

Solid, contracted revenue model with high stickiness — Long-term contracts (3–5 years) with IPCA, collective-bargaining and diesel pass-through adjustments protecting margins

3

An asset base that compounds competitive advantage — A modern, 100% owned fleet of 373 vehicles creating operational flexibility and hard-to-replicate barriers

4

Integrated capabilities delivering a full-service edge — GPS telemetry and driver monitoring, with in-house maintenance [TBC], for a high-uptime operation

5

Multiple, executable growth avenues — Geographic expansion, fleet electrification, technology-enabled services and consolidation of a fragmented market

1 A solid track record with blue-chip clients

Long-term contracts across industrial, agribusiness and consumer-goods sectors — serving +50 clients

SELECTED CLIENTS

PORTFOLIO CHARACTERISTICS

clients served

**3–5 years**

average contract term

**Recurring**

revenue contract model

**[xxx]**

of contract backlog

Source: Company. Client relationship metrics (contracts delivered, years of relationship, share of revenue) to be confirmed with management.

2 A contracted revenue model built for stickiness

Long-term contracts with built-in adjustment mechanisms transfer the main cost risks and protect margin over the cycle

BUILT-IN PRICE ADJUSTMENT MECHANISMS

IPCA

General inflation indexation applied to the contract value

Collective bargaining

Driver wage increases negotiated sector-wide are passed through

Diesel variation

Fuel price movements — the largest variable cost — are passed through

WHY CLIENTS RENEW

- ▶ **Operational embedding** — Routes, shift windows and stops are designed around the client's own operation — switching supplier means redesigning it
- ▶ **Compliance exposure** — Employee transport carries labour and safety obligations; an established, compliant operator lowers the client's risk
- ▶ **Dedicated assets** — Vehicles and drivers are committed to the contract, so service continuity does not depend on spot capacity

CONTRACT PROFILE

4 Technology-enabled operations support high reliability

GPS telemetry, driver monitoring and operational discipline keep the fleet running reliably across all bases

GPS Telemetry & Driver Monitoring

GPS-based tracking and AI-powered driver-fatigue monitoring provide continuous oversight across all bases

ERP & Management

TOTVS Protheus underpins enterprise resource planning and back-office control

Fleet & Maintenance Management

Specialized systems manage maintenance workflows, parts and fleet operations

Safety, PPE & Inspection

Digital checklists, PPE control and safety management reinforce operational discipline

Source: Company. Availability and preventive-maintenance metrics, and the scope of in-house maintenance, to be confirmed with management.

5 Multiple avenues for continued value creation

Geographic expansion, consolidation and fleet electrification position Mobi for a sustained growth trajectory

**A**

Deepen share & expand geographically

- ▶ Grow wallet share with existing clients and win new logos
- ▶ Expand within the GO–DF–MG corridor and selectively into adjacent regions
- ▶ Leverage the existing base network to serve new sites

**B**

Electrification & tech-enabled services

- ▶ Gradual fleet electrification aligned to clients' ESG and Scope-3 goals
- ▶ A technology layer — route optimization, booking apps, carbon dashboards
- ▶ Driver capacitation and retention programmes addressing the labour bottleneck

**C**

Consolidate a fragmented market

- ▶ A highly fragmented Brazilian market with consolidation already underway
- ▶ Mobi's scale and track record position it as a natural consolidation platform
- ▶ Selective acquisition of smaller regional fretamento operators

Source: Company; press research. Growth avenues to be validated with management.

Executive Summary

▶ INTRODUCTION 04

▶ INVESTMENT THESIS 10

▶ COMPANY OVERVIEW 17

▶ FINANCIAL HIGHLIGHTS 25

A track record built over more than 20 years

Mobi has +20 years of experience in urban mobility and corporate employee transportation

Source: Company. Foundation year and milestone dates to be confirmed with management.

Strategically positioned across the Midwest and Southeast

From its Goiânia headquarters to 10 operational bases across Goiás, the Federal District and Minas Gerais

States with operational bases

1	Headquarters	10	Operational bases
3	States covered	373	Owned vehicles

Headquarters — Goiânia, GO

Corporate HQ (Garagem Central) centralizing fleet management, monitoring infrastructure and administration

10 ACTIVE OPERATIONAL BASES

Anápolis – GO

Largest base outside HQ, supporting fleet availability across the Goiás corridor

Brasília – DF

Garagem BSB supporting operations across the Federal District

Senador Canedo – GO

Support base close to client sites, enabling faster response times

Uberlândia – MG

Serving the Triângulo Mineiro region with strong execution oversight

Further bases: Nerópolis, Alexânia, Rio Verde, Pires do Rio and Itumbiara

A recurring, contract-based operating model

Revenue is generated through long-term transportation contracts operated across two entities and a network of bases

Dedicated fleet contracts

Long-term contracts (3–5 years) providing dedicated vehicles, drivers and routes, billed on a recurring monthly basis

Route & shift management

Transportation planned around client shifts, sites and condominium routes, with telemetry ensuring reliability and safety

Two operating entities

Revenue consolidated across AGM Caetano and AGM Alpha, together reaching BRL 140 Mn of net revenues in 2025

Source: Company. Revenue split and contract economics to be confirmed with management.
