

Development stage by product — Weapon Systems and Munitions

Seven of eleven products are qualified or already in production, on lines that are built and rated

PRODUCT	In development	In build	Capacity rated	Qualified	In production	EVIDENCE PUBLISHED BY THE COMPANY
Weapon Systems						
Armadillo MRLS anti-drone launcher vehicle				●		100% completion · +100 units/year rated
70 mm rocket Air-to-ground and ground-to-ground				●		100% completion · 20k+ units/year rated
Anshar Ground-to-ground kamikaze drone				●		100% completion · up to 500 units/year rated
Electronic fuzes Precise detonation for air-to-ground				●		100% completion · 30k+ units/year rated
Rocket launcher pods 7 & 19 Rotary and fixed-wing compatible				●		100% completion · 200 units/year rated
Dagger Guided bomb system, three models			●			Capacity rated per model: 840 / 500 / 120 units per year
Munitions						
MK line filling MK-81 / 82 / 83 / 84, Tritonal and Comp B					●	81k units/year rated · +35k units delivered in 2025
BLU-109 Anti-bunker penetration bomb					●	Combat proven in 2026 · new contracts signed in 2025
PBX 109 filling MK series filled with PBX 109			●			95% completion · 23k units/year rated
Hurricane High-blast heavy ammunition			●			95% completion · up to 10 units/year rated
155 mm M107 / ERFBBB NATO-standard artillery projectiles			●			120k units/year rated · no completion published

Stage is the highest step the product satisfies: in production = delivered, in service, combat proven or under signed contract; qualified = 100% completion published; capacity rated = annual production capacity published; in build = completion published below 100% or plant under construction; in development = specified without either. Evidence as published by the Company.

Where the portfolio sits

11 of 11 products already have a rated production line

- Every Weapon Systems product on this page has published a 100% completion figure or a rated capacity
- The two products in serial production are the ones carrying deliveries and signed contracts today
- The 155 mm line is rated at 120k units a year — the largest single capacity in the group

Development stage by product — Energetics, Missile and Space

Energetics sells lines that are already running; Missile is where the development still sits

PRODUCT	In development	In build	Capacity rated	Qualified	In production	EVIDENCE PUBLISHED BY THE COMPANY
Energetics						
Turnkey production lines Full chemical and filling plants, delivered					●	US\$ 75 mm signed · support contract running in Saudi Arabia
TNT Military-grade trinitrotoluene			●			500 to 5,000 tons/year line portfolio · US\$ 15+/kg
RDX Hexogen, high-explosive charges			●			100 to 3,000 tons/year line portfolio · US\$ 70+/kg
HMX Octogen, Military Grade B			●			90% completion · 10 tons/year rated · US\$ 500/kg
Composite rocket propellant Solid propellant for missiles and rockets		●				20% completion · +5,000 m² plant under construction in 2027
Missile						
Diana High-speed aerial target drone					●	Sole supplier of air-to-air target drones to the Brazilian Air Force
Target systems Air-to-ground, aerial and scoring systems					●	In service for live-fire training, with technical support
RATO hypersonic accelerator Rocket-assisted take-off, Mach 10.3		●				First hypersonic accelerator in Latin America · step toward VLM-1 certification
SRAAM Short-range air-to-air missile	●					Named as under development in the unit's core capabilities
MAR-1 Anti-radiation missile for SEAD	●					Named as under development in the unit's core capabilities
Space Systems						
VLM-1 Microsatellite launch vehicle, 500 kg to LEO		●				Brazil's first space launch vehicle · industrialisation started in 2025

Stage is the highest step the product satisfies: in production = delivered, in service, combat proven or under signed contract; qualified = 100% completion published; capacity rated = annual production capacity published; in build = completion published below 100% or plant under construction; in development = specified without either. Evidence as published by the Company.

Where the portfolio sits

6 of 11 products already have a rated production line

- Energetics sells the line itself: US\$ 75 mm is already signed and a support contract is running
- The target and drone family is in service as sole supplier to the Brazilian Air Force
- Development is concentrated in three programmes — RATO, SRAAM and MAR-1 — and in the VLM-1
