JOHN DEERE

Our Purpose

To create prosperity in Brazil through technology and machines for farming, increasing productivity and improving people's life.

Living Our Values Daily

Respect

Every interaction honors people and planet

Innovation

Creativity powers our future

Meritocracy

Talent rises through achievement

Ethics

Integrity guides every decision

Safety

Protection is non-negotiable

Productivity

Excellence drives our results

Leading the Agricultural Technology Sector

58+

Years of Experience

Building trusted relationships and industry expertise since our founding

13

Branch Locations

Strategic presence across the AOR for Rapid response and local support

600+

Dedicated Employees

Expert team committed to excellence in service delivery

200+

Municipalities Served

Comprehensive coverage ensuring accessibility for all customers

Service Excellence

70% of our workforce dedicated to after-sales support and technology innovation

World-class service throughout equipment lifecycle

Market Leadership

Serving 35% of Brazil's sugar cane cultivation area / 50% of the State of Sao Paulo

Specialized Key Account teams provide personalized strategic solutions

Parts Availability

Over 88% immediate availability

AOR

Crop distribution:

3,7 Million Hectars

**The sugarcane area
represents one-third of
Brazil's total sugarcane
and 50% of the crop in
the Center-South
region.**

Sugarcane: Nature's Most Complete Source of Energy

From the field to the world — sustainable power in every form

Energy for People

Sugar: the world's most affordable source of calories

- Natural, renewable nutrition
- Feeds billions globally
- Drives tropical economies

Energy for Mobility

Ethanol: the cleanest automotive fuel at scale

- Reduces CO₂ by 80%+
- Powers sustainable transport
- Agriculture meets mobility

Energy for the Planet

Bagasse: waste transformed into green electricity

- Powers homes and industries
- Closes the carbon cycle
- Turns waste into value

One crop. Three energies. Infinite potential.

Sugarcane is not just a plant — it's the world's most efficient converter of sunlight into clean energy, bridging food, fuel, and the future.

Innovation & Technology

run through all
our products and
processes

HARVEST EDGE” - TRACBEL AGRO PROGRAM

Full field monitoring of all CH950 harvesters

☐ Sugarcane Production Management

- Operational performance.
- Technology usage analysis.
- Machine alerts.
- Machine telemetry data.
- Downtime reasons.
- Harvest variability map.
- Technology usage analysis.
- Scintillation monitoring.

Tracbel Agro

AgronomiQ transforms complex field data into simple, actionable and intelligence information, helping producers make more profitable and sustainable decisions.

Reduce operational risks and costs, increase productivity, and ensure **data-driven decision-making**.

Key Features:

- ❖ **Spatial Monitoring:** Uses satellite imagery to monitor biomass, vigor, chlorophyll, and soil moisture.
- ❖ **Integration with Agricultural Machinery**
- ❖ **Climate Modeling:** Uses meteorological data
- ❖ **Productivity Prediction:**
- ❖ **Smart Soil Sampling**
- ❖ **Advanced Geospatial Analysis:** Spatial layers, interactive maps, and customized analyses.
- ❖ **Smart Dashboard**

Tracbel Autonomous Store

High Availability

Store open 24 hours a day and 7 days a week

High Uptime. Higher Productivity

Engineered for continuous operation, season after season.

Customer Portal

Parts inventory management.
User access management.
Management of removal of parts and tools.

Frictionless Experience

Employees can pick up parts, tools and make returns without human interference in the process.

Smart, Simplified Control

No bureaucracy. Full control. 100% process visibility.

Modular Construction

Store module with thermal comfort and air conditioning.
Technology and scanning module.
Solar power module.
